SKILLS

- ❖ **Programming Languages:** Java, Kotlin, Python
- ❖ **Web Development:** HTML, CSS, JavaScript, React, Node.js, Express
- ❖ **Cloud:** Git/GitHub, AWS, Firebase, Docker, CI/CD
- ❖ **Mobile Development:** Android (Kotlin, Jetpack Compose), Firebase, ML Kit
- ❖ **Databases:** MongoDB, MySQL

EDUCATION

- ❖ B.Tech | Rungta College of Engineering and Technology *CGPA: 8.1 | (Sep '22 – Jun '26)*
- ❖ XII (ICSE) | D.C. Lewis Memorial School *88.0% | 2021*

EXPERIENCE

- ❖ **Full Stack Developer Intern | Shoro.ai, Canada**
Developed Ed-Tech features for the company's web and Android platforms, integrated an in-built chatbot system, and optimized application performance across frontend, backend, and database layers. Contributed to feature development, testing, and deployment in collaboration with the engineering team – Next.js, MongoDB, React.
- ❖ **Web Developer Intern | Apex Planet, Bihar**
Developed responsive and user-focused web pages by completing assigned UI tasks, implementing new features, and refining layouts based on design requirements. Collaborated with the team to test, debug, and enhance front-end functionality, ensuring smooth performance and a consistent user experience – HTML, CSS, JavaScript.
- ❖ **Full Stack Project Developer | Grocery Mart (Freelance Startup Work)**
Built a complete grocery e-commerce platform including product catalog, cart and checkout workflows, and admin management features. Designed and developed customer-facing pages, handled real-time updates, and delivered the project end-to-end based on client requirements while ensuring smooth shopping experience and usability – Node.js, MongoDB, React.
- ❖ **MERN Stack Developer Intern | UptoSkills, New Delhi**
Contributed to the development of an AI-powered resume builder using the MERN stack, working on dynamic templates and AI-driven enhancement features. Collaborated on end-to-end functionality, improving user experience, and delivering updates across the project within team requirements – Node.js, PostgreSQL, React.

ACADEMIC PROJECTS

- ❖ **FusionAI | Unified AI Toolkit Platform** [live](#)
A platform that consolidates multiple AI tools into a single interface, enabling users to access diverse AI-powered functionalities through one subscription instead of separate services – Node.js, React.
- ❖ **IntelliTalk | AI-Enhanced Chat Platform** [live](#)
A messaging platform enriched with real-time translation, smart reply suggestions, and image sharing, built over socket-based communication while retaining core chat features for seamless interaction.
- ❖ **theGroceryMart | Full-Stack E-Commerce Platform** [live](#)
Developed a full-stack e-commerce platform for a startup enabling sellers to list products and buyers to browse, purchase, and manage orders seamlessly.
